just to clarify this it upstream of the res right??? Down from the pumphouse?? Somebody said green lane?? that's not green lane is it??

Took a kayak downstream from the perky/Unami confluence last weekend. Flyfished a little but was only catching minnows that were hittin the surface. Found my buddies rod he dropped in the creek the week before and it still had the rapala lure on it, chucked it in and hooked a darn musky. I've heard they were in there but thought they were more up toward deep creek lake. Take that for what it's worth I guess.
