4. Aren't the low-riding "parachute" patterns also technically a stage of emerger?

that's likely a Klinkhamer, which is most definitely fished as an emerger.

As pcray says, many flies can be fished as an emerger - soft hackles, wets, unweighted nymphs, drowned dries, comparaduns etc.

I normally fish em on a very short tippet off a dry or on their own dead drifted.
