The Elkhorn in Mcdowell county may be one of the best wild trout stream in the state. A tremendous population of wild bows and browns.

However

Be ready to fish in potentially unhealthy conditions. Most if not all sewers from the homes along the stream flow into the stream. If you fish, have a tetnus shot and you definitely want to clean your waders and boots with bleach. You will also meet some colorful people. I`ve fished this stream several time when I lived in WV a decade ago and done very well. Fishing the Elkhorn is known as fishing the poop.

If you want more info, you may want to look at wvangler.com website.
