Started fishing neat Boot Road hoping to find rising to sulphurs. This was my first time on this stream; not impressed. There were def. trout there but water is very slow. Lots of midge activity, and fish rising, but the fly barely moves in the water. Started flipping rocks; no signs of bug life. Certainly no sulphurs nymphs, but there wasnt anything. Very disappointed. I saw a few bass there were good size, and pan fish. Might be a decent warm water fishery.
