I staggered my release again this year. Our first batch, which had over 250 hatch, died off over December-January. Amidea sent us about 50 more fry, of which, 15 made it.

My district won't provide for a bus, but will let me take van that holds 8 kids. I wouldn't want to try to contain 130-7th graders, anyway.

We released both batches where the "Run" enters the Yellow Breeches. Aside from the die off, it was a good year.
