You might be thinking of the west branch above the res. The main branch runs up under church rd at a fly fishing only section and continues up past the pumphouse and knolls and also well up into hereford where I fish it. It's pretty heavily fished in that area so I can't see anyone here getting their rod bent over any spot burning stuff.

I've hiked it from the FFO section down to the res and to the best of my knowledge it's not posted at all there. Dumps out around the bird sanctuary there on the opposite side of 663 from the high school.
