A lot of ways to keep organized. With a modest amount of flies try two separate boxes:

"Dries"- Try keeping all dry flies bunched together like BWOs, Hendricksons, Suphurs, etc. Same for caddis tans, black, grannoms, etc. Same for stoneflies. Have a place for generic dries that don't match any specific insect.

"Wets" - Have a nymph box and do the same thing for specific hatches and keep generic flies in there too like HEs, PTs, GWs, etc. You can also keep wets along with buggers and streamers in that box.
