Both... and / or either.

If I had just one, I'd take the 8.

If you are throwing bigger flies and / or fishing around the weeds, the 8 is definitely the way to go. You might get into stripers or toothy critters too... and the backbone of the 8 would be useful there. 8 could help if the wind picks up, also.

If you are fishing open water with smaller flies, a 5 could be enough.
