Beast,

You nailed it. Storms have wreaked havoc on the area. Some tribs in Sullivan County are absolutely decimated.

There were days when me and my oldest would have 50 fish days and we'd consider it a rough outing.

I have still never seen a stream where the stockies color up as quickly as the sock. The amount of crayfish that used to be in there, along with the bug life was amazing.

Best March Brown hatches I have ever seen occurred there for many years running.
