I posted a stream report last week on Kettle Ck. Potter/Clinton Cos.

One of the replies asked about drilling in the area.

Saw none.

2 years ago saw a well near the East Branch Sinnemahoning near Cherry Spring St PK.

This year talked to a land owner near Carter Camp PO Cty.

No drilling in this area 'although testing was done.

According to him there may be gas, but no way piping it out. Or too costly to do so.
