When i started flyfishing about 15 years ago the Park stocked close to a 1000 fish in this section and about 1500 in deep creek lake. The numbers have gone down every year since and they stopped stocking deep creek lake altogether which the State now stocks instead of the park. I believe the park stocks about 40-50 rainbows now in the spring, not sure about Fall stocking they used to stock then too. Back in the day there would be about 10 guys on each side of the dam trying to fish it, it was quite a circus.
