That is a nice find. I have a Helios 8'4" 3wt and out of all my rods it is still my favorite and the one I use most.

Just to edify your observation, a fly shop owner who I know has the same opinion. He sold a lot of his other rods when the Helios came out and, with all the rods at his disposal, proclaimed that very 8'4" 4 wt rod to be the be-all, end-all, trout stuff of the universe. I accidentally fished an 8 wt off of my 9 ft 4 wt. (got the rod tubes mixed-up) I spent a week fishing a 6 wt line on my 9 ft. 4 wt mid-flex in Montana with no regrets. All it required was a TAD longer wait time during the cast with the 2X heavy line. Very good rods, but for the price, they better be!
