New to the forum here and spent some time searching through the topics and some of the posts. Some pretty good info here.

Been down the vest to small chest pack road and recently purchased a Fishpond Double Haul Chestpack/Backpack. Found myself on the stream without a jacket/vest/lunch too often. Also liked the idea of being able to just take the chestpack when I'm only going to be on the stream for a couple of hours.

Over the years (20+), I've become interested in how people organize their vests and packs. There's a constant struggle between carrying enough to be effective and comfortable and too much.

So, how do you set up your vest and packs? What do you carry and how? Pics are always great.
