Man, get ready for a bunch of opinions. All will have merit, except maybe mine.

I'm a bad role model because I put everything I can think of in my vest. On top of way too many flies and fishing stuff, I also have an inhaler, tylenol, sun screen and bug spray. I'll bet my vest weighs 10 pounds! No wonder I need a back brace wading belt!

I just bought a new vest and transferred everything over. My new vest has a bunch of pockets and I even had to throw some stuff away because the new vest with it's 20 some pockets, didn't have room. You think that would be a wake up call that I carry too much stuff but I'm thinking my vest just doesn't have enough room! 🙄
