A nail knot is fairly easy to tie. I use a fly tying bobbin, Works very well. Just wrap the knot over the stem. Push the tag end through. Slide it off and tighten. Vary simple that way. No need for a special tool. I then use a short pc. of mono with a loop. Been doing it that way for as long as I can remember. As far as twist I agree usually the fly or too light of a tippet or too soft of a tippet. Just my 2cents.
