Davy knot

I used to use this knot. Until I started losing fish because of it. Good knot fast and easy to tie but i dont trust it anymore. Lost a big brown 'cause that knot failed. Never tied it again after that.

Yea you have to be really careful with the Davy knot - when you clip the tag end you can't pull on it at all because it'll loosen the knot. Then you always have to tug on the knot a little to make sure it's snug. I lost a couple flies before I figured it out. Lol.
