I have a 10'6 5wt switch rod that a friend built for me that I use primarily for big water nymphing and streamers. I am currently using an Orvis LA II reel and WF floating line. I would like to expand the rod's use to warm water fishing on mid-large size streams/rivers. I am interested in learning some basic spey casts and how to properly set the rod up for this application. Any tips on PA instructors who could teach me the basics and help with set-up? Thanks in advance for any help.
