just got back from the usvi

flew there and back, with (2)54 inch rod tubes, they never said a word. wife had one, i had the other. went through customs on the way home

they didnt even count it as a separate item. we both had a carry on and a backpack(personal item)

also flew out to bozeman a few years ago, same deal

they wont hassle you

BTW, packed my flies on the carry on both times, feared losing them in the checked luggage, no problem there either

dont fret it, go have fun. what are you fishing for, where you fishing at?
