I fished the project, and upstream a short ways, with a buddy on May 29th. All I caught were those stocked fingerlings in the 8 inch range. There seemed to be a lot of them still around which was good to see. And they were both Rainbows and Browns. Also caught a wild brookie. My buddy caught what appeared to be a holdover brookie in the 10 inch range. I doubt a stream bred brookie could get that big in Little Sandy, but it had nice fins and looked like it had been in there a while. Not sure where he came from. Caught trout on Elk Hair Caddis and Beetle patters.
