Broad-Brimmed Hats, magnifiers & bug nets

Does anyone have recommendations for broad-brimmed hats for fishing?

I've been wearing a ball cap, with the standard fly shop issue magnifier attached to the brim.

But I'm thinking of getting a broad-brimmed hat to prevent sunburn.

And I'm thinking of getting a bug net, with the idea that a bug net might work better with a broad-brimmed hat than with a ball cap, because the net would be further away from the face.

And I'd like to continue using a magnifier, attached to the brim of the cap.

Any suggestions on all of the above?
