YES

I have many times in the past been able to lure fish to my dry fly when it SEEMS nothing is rising and nothing else is attracting fish ie. nymphs ,streamers, emergers terrestials. I mean nothing.

But on many occasions I have been able to LURE fish to the surface while persistently presenting a dry fly in lanes I feel a fish are. Not a lot of fish but I have got them to come up.

Flies: Adams Adams,parachute, Royal Wulff, Gray Dun patterns, Big Brown MAy fly PAtterns I just keep trying. And then all of a suddenBANG.
