Well said but too many guys have spools of 9x and boxes full of #28 tricos. Once the water gets to the point where it's 70 degrees as the low, I'm done fishing there.

Guys play a 12" fish like it's a tarpon. 6x at the very lightest. When they take, tear their lips off. Get them in and let them loose. Don't discount the herons. They put a hurting on the population.

Anyone else every stalk the bonefish in there? 5-7 lb carp on a 3 weight will test your metal.
