Anyone ever fish Sedge Island? A buddy of mine (and PA fly fish guy) fished it yesterday. The place looks like it could be loaded with fish. Yesterday though I caught one short, he got skunked.

Really cool area too. We were able to get out in the yaks and beach them up on the sod banks than just explore. Perfect for fly fishing as well since the casts don't have to be super long so wind isn't as much as a factor like it is on the beach.

We are definitely heading back there to explore some more. We fished the outgoing, which you would think would be good since it'll pull the bait fish out of the small cuts were the bigger fish should be waiting to gobble them down but, it didn't work that way yesterday. The water was pretty cold until later in the afternoon so maybe that shut the bit off.
