When you say dewater you mean COMPLETELY DRY? I recall the last time they did it but I dont think it was a 100% kill of the entire 1.5 mile stretch to the Spring house. As a contractor at the time I spoke to the site contractor that shut the pumps off several years ago. He was on a project of mine. He just laughed about it as if it was no big deal. I wanted to strangle him for his ignorance to the resource.

Please do keep us informed. This meeting reminds me of talks with ACE about FEW on the Lehigh. Those pumps are the life blood of the whole creek down to Easton really. It would be awesome if they would flow constant instead of fluctuation 80 cfs every 3 hours. Just look at the USGS or fish it. Water levels go nuts all the time and that can't be good for the ecosystem.
