Why does everyone think wild trout are small? THEY ARE NOT SMALL.

Who said that? The D, Penns, LJ are all full of huge wild browns. I think you are thinking of small, wild, native brook trout which tend to be small as evidenced by the hundreds of photos on this site.

The thread is about small stream fishing, you assume that is what I'm talking about, not The D or Penns. Despite the fact that I am sometimes off base, I responded to several of the itty bitty streams = itty bitty fish. Monday the last fish I caught was a very heavy and long fish in a 15 foot wide stream. So small streams do have plenty of big fish, nearly all of the brookies caught that day were larger than legal. So no they weren't itty bitty fish in a small stream.
