Fly Fishing = Ingenuity

Today I figured out why I like fly fishing so much. I was listening to speaker talk about "Ingenuity" and the word describes fly fishing to a T. It's all about finding creative ways and modifying your approach to be successful. It's problem solving but there really is no "end", only growth. It's an evolution of ideas and attempts with (at first) limited resources.... I could go on but I'd rather hear your thoughts!
