They are made by Lamson for Cabelas but they do not have the conical drag system. Still, the drag is very good. I just ordered the 3 size and an LSI 8 weight rod for a whopping total of like \$95. The two piece rods were on sale for \$49 from \$179 which is crazy and have a lifetime warranty. So my salmon gear for Pulaski cost me about the same price of the prestige premier before the sale. Good luck if you buy one.
