I've never been to Montana, but I recently picked up a copy of *Bud Lilly's Guide to Fly Fishing the New West*, published in 2000. Lots of good info in there.

For reading that isn't so much of a how-to guide- Tom McGuane's *The Longest Silence* contains some neat essays on Montana trout fishing, as do most of John Gierach's books. (Check the table of contents.) They're both very good writers, and they also thread in a lot of helpful tips on various rivers and hatches in the process.
