Not a shill. That would imply that I'm trying to hide the fact that I am in the industry. I just told everyone that I work in the oil and gas industry. I also worked for DEP as an inspector for the Office of Oil and Gas Management. I also have a degree in geology. Not a shill sir, but an educated and experienced geologist that understands that we have been drilling wells for 150 yrs, fracing wells for almost 70 years and the issues being brought up by an ignorant news media and the anti-drilling activists and politicians are nothing more than a front to shut down all drilling for oil and gas. This industry is one of the most regulated and safest industries in the US and produces the only energy (besides nuclear, which the anti nuke crowd already shut down) capable of providing power to run this great country.

I really just want to educate and assure folks that drilling for oil and gas is being done correctly.
