albatross,

I saw no other fisherman last night. I was fairly far upstream of 422 though. Just a note for you alba, IMO the delayed harvest area is not the best place to go for bass. I fished the white fly hatch one night last year in the area and got skunked! But when I moved immediately upstream or down I got into fish. Go figure. I also think between the Harris and Eckert bridges can be very good. Again, that's my opinion. Good luck.
