So I think I need a 4 weight...

I ordered a Redington Link 490-4 as an impulse buy because of a coupon + free shipping that I had from Sierra Trading Post. I got the rod for \$171 from \$350 to be exact and now my question is this: Has anyone ever used this model before and can comment? It is there flagship model that replaced the very stiff CPX...this rod is supposed to be more forgiving. I cannot seem to find too many reviews online so I thought I would ask here. Thanks!
