dont remember that lake there was a lake on the road from Caledonia back to Pine Grove furnace that drained back do9wn the Caledonia side is that it?

No, this lake is Long Pine.

The lake you remember was known as "Birch Run" or "Chambersburg Reservoir" and remains drained. We've had this discussion before as there remains confusion about this lake versus the one that has been drained.

The problem stems from the fact that Long Pine is now sometimes called "Chambersburg" because it is the water supply for that town.

The old Birch Run lake bed will not be re-filled but is currently being managed as recovered forest. TU is also working on a promising project, to begin shortly, in conjunction with DCNR to recover the streambed as brook trout habitat.
