O.K., this isn't so hypothetical. CVTU is sponsoring a competition in Carlisle 9/7/13.

The rules are available for view on their website. Max. 9' 5 wt. rod, line as I mentioned in initial post with min. length of 88', wt. forward with no long belly tapers allowed. Leader between 7 and 9 1/2 ' and yarn fly.

Distance lane is 10' wide.

Target rings are 30" inner ring diameter and 54" outer ring diameter. Distances are: first target 20'-25', second target is obstacle target directly behind first target, third target 35/-40' and bonus target 60'. Obstacle target requires that line cannot touch first target when cast to.

There are time limits for both distance and accuracy segments.

Obviously, I haven't listed all of the specifics.

No this isn't a Hardy nor Fips Mouche event.

Don't know anything about a Hardy event. I do believe this competition may draw some of the "big guns" out there.

I'd might give that a try, just do it and see how I do.
