I need to make friends with someone with a boat!

Nah. All you need to do is to wade out off one of the primary points (or mud flats) that extend into the main body and start casting. Early in the season (May) you catch most during the day. Right now, the night bite starts to pick up. You will go many hours without a take, then WHAM! And if it's a pig, you'll be into your backing in a few seconds. But be prepared for lots of casting.
