Ry the problem with wade fishing is you can't do any kind of figure 8 or oval to entice a following fish. You can do a change I. Detection like a sweep that's it. I fished primarily from foot it can be done but a boat ups the hook up percentage. Most hook ups are the first 2 strips or a foot if the rod tip.

I have never seen my backing on a musky and have caught my share of 40 + inches. They don't run, they stand there ground and bulldog ya. Head shaking gator rolling. If you see your backing your soft paying em. You can put the but to these things.

Just cast, cast, & cast keep your fly swimming.
