Tomorrow is the first fly fishing outing for my chapter of Project Healing Waters. A local American Legion is catering us lunch and a local hatchery donated about 200 fish in a Sportsmans club pond. Not ideal trout fishing, but the more fish these vets catch, the more interested they get in the sport. Any fly suggestions for stocked fish in still water? I have about 100 buggers in every color I could get. Also have some other assorted streamers to strip in and see what we can get. Never really fly fished a pond for trout before. If all else fails, there are some spinning rods if it comes down to it. Any other fly suggestions?
