Yes I fished THE Letort today 6-14-13 10am - 2pm

This stream is everything u read about.

Crystal Clear even after the rain.

Slow this stream does not make a sound!!

water temp 58-F.

Pretty much un-wadeable but then again u don't need to or should.

Managed one very small brown near the lower section.

Fished the Special reg area too.

Saw many fish trout and suckers.

these fish spook easily.

saw a snapping turtle and maybe a copper-head snake could have been a water snake .

Ty to the men on this forum who helped get to the strem.

Just wanted to be able to say I FISHED THE LETORT
