Surf fishing is allowed at Sandbridge (or at least it used to be during the off season). Just walk the beach early in the morning and cast a Clouser Minnow in the wash and you ought to be able to connect with a flounder or three. Other fish are around but may be spotty close to shore - this could include speckled trout, redfish, small bluefish, and perhaps some other stuff. A 3" long, green over white Clouser will catch 'em all.

I don't know if it's still there but when I lived down there about a decade ago, there was a great aquarium in Virginia Beach. If it's still there, it's worth a visit.

I've got a ton of salt gear - shoot me a PM if you'd like to borrow some.
