pcray.....those leader formulas for tight brush i got out of "Trout Tactics" Humphries book are probably George Harveys but whatever the case they do work and they are 5 1/2' so you have plenty of line out past the tip top guide. There has been a great year so far for hatches on the small streams , some of the best i've ever seen. Bonzozo.....try a downwing pattern caddis or stonefly with a foam extended body , tied seperately on a needle , tied in at the bend , with a nicely visable wing of z-lon or zing or whatever you like. Floatation and durability matter on small streams. GOOD LUCK!!!
