Curious...what did you use?

For me, smaller pheasant tails in traditional and olive, 16 and 18, and gold ribbed hares ears. If it is your style, soft hackles always seem to take fish on the Gunpowder - add a soft hackle to any of the above, or traditional partridge & orange, partridge & green, partridge & yellow. Since I started fishing soft hackles, gold ribbed hares ear soft hackle in 14 or 16 have caught me more fish than I can count.

For what its worth, I have never had much luck with any kind of caddis pupa on the Gunpowder. Midges and brassies work well.
