I do remember looking into the violation of the public trust and the rewriting of the laws I believe. Oh well, back on the industry list of extremists for viewing this thread(Hi guys, we know you mine this site).

How many members belong to the PEDF?

383 million since 2008? And that is just the portion that the state got under the OGLF?

Scarce resource, the gas will be gone, so will the money, and so will the forest.

Nuclear reactors on state forests should be now.

Did you see that reservoir size on Tioga State Forest in that picture? Enormous. Guess it's being pumped up from a stream or river. Can the gas companies buy river bed and own it to pump at will?
