"But, sorry flies is flies."

Maybe if you are buyinig the typical Catskill style dry flies, generic nymphs, and compara-duns that are anorexic. But if you want really well tied special patterns that aren't found in a catalog or if you want hatch specific life cycle patterns of mayflies you surely aren't going to find them at some on-line off shore fly manufacturer.

I catch hundreds of trout every season and dozens are 17" - 22". I attribute much of that success to my fly patterns that were developed over a lifetime and won't ever be found on-line for \$.89 each.
