If the message said 'private' I'd agree, but this is the Internet...

PA has dozens of great streams, no one report or one's reports is going to make me fish a stream any sooner - I have a list of 70 odd instate and another 20 or so in NY & NJ to visit.

I can see certain stretches of streams getting crowded during specific hatches but not much else.

I like the varied reports we get on here. It's educational to hear about people's successes and failures, keep em coming fellas.
