Dear God, why in the hell would you be consider another 5 weight if you already have the scott s4?!?! I reiterate, buy a 6wt if you wanna burn money. A 7 weight would not be out of the question.

I have a wide range of 3x and 3sx and gave a gvx to a friend as a gift. i will be fishing with him next week in Maine as will be side by siding them. I will let you know what my opinions are on the comparison.
