Revamped TCX?

It is meant to replace the TCX in the lineup.

So, sort of a TCX w/ the new graphite (Konnetic), but it does have all new tapers.

Plus, given how much faster the ONE was than the Z-Axis it replaced, I'm wondering if the METHODOD will be that much faster than the TCX.

Much faster than tcx? they should just call it "broomstick", lol.
