Jeremy,

It never hurts to ask. I think if landowners are approached and asked in a respectful manner many would be willing to allow fishing. Explaining that you are flyfishing and practicing C&R is always good to let them know. Always be sure to ask where they would prefer you to park so you don't pose any inconvenience. Even the Amish farmers are often willing to allow fishing. Just be careful you don't catch any of the kids on a backcast. They come in all sizes and are often very curious. 🍷
