In the process of putting together a trip out west from Sept. 2 -8. I will be spending 3 days north of Jackson Hole at the base of the Tetons and looking to fish the Snake and some of its tribs, then moving up to Lamar Valley for 3 days.

I am very familiar with the Lamar area having done several trips there, but have never fished the Snake watershed. Looking at wading versus the drift boats.

Anyone have any experience on the Snake? Looking for input, information, or contacts on water temps, trib info, access, hatches, success levels, etc.
