The Snake is a beast of a river. If you're looking to wade, even if the flows are lower, I'd strongly consider the tribs for a more enjoyable experience.

Gros Ventre River, just NE of JH would be #1 on my list. Didn't get a chance to fish it (kicking myself now and vowing to return), but did some hiking back there...absolutely beautiful red rock scenery and mostly Cutts from what I understand. The area around Lower Slide Lake looked especially appetizing.
