Summer Heat & Water Temperatures

The forecast is for some real hot weather this weekend.

Many trout streams will go over 70F.

There are some streams that stay cooler. And in the early morning is when water temps are at their coolest.

What brought this up for me was seeing a post that someone is planning to fish Penns Creek this weekend. Penns is one of the streams that warms up pretty quickly. I think Penns will go well over 70F this weekend.
