I grew up near Va beach as well...I haven't been able to fish out there as much as I hoped, only dabbling in SNP a few times. So I can't offer much advice.

I'm not sure if the crowds in SNP will hinder your fishing too much, especially if you are hiking...and a lot of the main hiking trails aren't always on top of a stream.

I've also heard the streams on the western side of the range get warmer/lower quicker and can be more finicky in general
